## REASONS FOR ALLOWANCE

1. This is an Examiner's statement of reasons for allowance. The closest prior art Wagner U.S. Pat. No. 5,742,845 discloses an ATM or POS data transaction system. IBM Technical Disclosure Bulletin discloses an improvement to the web browser interface which would help users in deciding whether how to traverse previously visited web sites.

JP020002278766A Kusakabe et al discloses a server starts the FRB of a server and centerloads transmission data, and the FRB of the server receives the transmission data, subsequently erases its own IP addresses.

However, neither Wagner nor Kusakabe et al and IBM Technical Disclosure Bulletin singularly or in combination fail to anticipate or render obvious the recited feature:

As per claim 27 " wherein the second backstage control ATM object includes a time out value, wherein responsive to the automated transaction machine successfully loading the second instructions and a period of time has elapsed that is greater than the timeout value, further comprising: triggering a screen timeout event of the second backstage control ATM object".

As per claim 34 " creating a third association between the second ATM object and the fourth ATM object by visually representing the third association between the second and fourth icons in the work space, and wherein the third association created corresponds to a linking of an event of the second ATM object to a function of the fourth ATM object; starting the sync timer of the second ATM object responsive to the first association".

Examiner's amendment

2. Please cancel claims 1-26, 28, 31-33 and 39-43 without prejudice.

Confirmed by Wasil Daniel.
